

Dighton Court, London

Works involved swapping oil fired plant to gas

We are the principal contractors for this contract which is a boiler room that serves occupied residential dwellings, it involves swapping from oil fired to gas fired plant. Replacing the existing 2 central heating boilers with low now 220Kw Broag boilers and two direct fired gas water heaters, replacing all pipe work, controls, pumps and flues. Our contract is approx 160k. The challenge of this contract is to keep the hot water supply continuous operation, this will be done by using temporary flue at the initial start of the works.
